Mr. Jim Kinsey
Waste Reduction, Inc.
5367 Eagle Street
White Bear Lake, MN 55110

Dear Jim:

Enclosed are the purge and trap gas chromatographic results on the soil sample you submitted to our lab on 6/29/82.

During your recent visit to our lab, I had mentioned quantitative analytical variability in your soil sample. After discussing this more fully with our chemists, they informed me that this was overcome by allowing the sample to sit overnight in the purge and trap vial filled with 10ml of water. So, I stand corrected.

If you have any questions concerning the results, please feel free to contact me.

Sincerely,

CAPSULE LABORATORIES
